

The Signet

Quick Start Guide – Firmware v1.3.0

STEP 1: Connect a USB-C cable to charge the device. Power on your Signet using the switch.

STEP 2: On your phone, tablet or computer, open your WiFi Settings and connect to “The_Signet_XXXXXX” where XXXXXX is unique to your device. No password required.

STEP 3: Give the connection a few seconds and the Captive Portal should appear. If not, open any web browser and navigate to <http://192.168.4.1>

STEP 4: Select your User Interface language from the list of available options that appears. See Figure 1

Note that ITU Morse code implementation remains regardless of selected language.

Step 5: Configure your Signet. See Figure 2

- Type in your message (up to 200 Characters)
- Select Mode: Invisible (IR)* or Visible (RGB)
- Select Color: R*, G, B, or Custom (Visible Mode only)
- Select Intensity (Low, Medium* or High)
- Select your WPM speed (Words Per Minute) 5/10*/15/20
- Press the Play button to begin message playback.

STEP 6: Close the Captive Portal or web browser and disconnect from the WiFi Access Point. Message playback will continue.

To reconnect, The Signet’s power must be cycled. Turn the switch OFF then ON again to relaunch the WiFi AP. This is normal operation and is meant to conserve battery life, protect your privacy and increase operational security.

The rules of Morse Code:

1. The duration of the dash is 3 times of dot;
2. Each dot of dash is followed by the blank period which equals to the dot duration;
3. Space between letters is 3 dots duration;
4. Space between words is 7 dots duration.

* Exclamation mark (!) and semicolon (;) is not in the official ITU recommendation.
